About me:

My name is [redacted] & I was in a very bad car accident on July 29th 2007, just 7 months after my 5 month old baby brother passed away from aids. I took my shoulder strap off just minutes before our crash & the impact made the lap belt break my lower lumbar & backless booster seat. My body was thrown forward so hard that it made my head go past my knees causing my spinal cord to stretch so thin that there's only a hair line of tissue connecting itself with my brainstem. I had a lot of swelling in my brain & around my spinal cord & didn't get my back fixed for 7 weeks. My parents transferred me from Arkansas Childrens Hospital to Dallas Childrens hospital since Ar couldn't pull a team of surgeons together to help me. While I was in Arkansas I got a bad scare on the back of my head & now have a permanent raw bald spot where it was. They did not care for me

VeggieTales, Spongebob, Avatar, Marvel Superheroes, Ben 10

All

God

after a few weeks of being there. I had a lot of intestinal problems in Dallas Children's & my parents had to threaten law suits many times just to get someone to listen to them. It was a good thing too bc one time my bowels stopped working & I needed immediate surgery, then another time my stomach got so big it was in my chest & they had to do an 1800 cc's of fluid out of me. Finally I got to go to Our House @ Baylor where me & my mommy stayed for 5 months. I had water shoot into my lungs, got pneumonia, & even died once. I overcame it all and am now Happy and Healthy at home with my family & pets. I Thank God for everything he has blessed me with and look forward to the next day.
